Application/Control Number: 10/608,117

Art Unit: 2879

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-13 and 20-30, drawn to an organic electroluminescence device, classified in class 313, subclass 506.
- Claims 14-19, drawn to a method for fabricating an organic electroluminescence device, classified in class 445, subclass 25.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case one could first form the second electrode layer on a sacrificial substrate, next form the organic light emitting layer on the second electrode layer, next form the first electrode layer on the organic light emitting layer, next one can form the exposed first electrode layer surface onto the first substrate and lastly one would dissolve away the sacrificial substrate. Also one could form the cell gap maintaining structures on the first substrate and then form the first electrode layer on the first substrate.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/608,117

Art Unit: 2879

A telephone call was made to Robert J. Goodell on August 9, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Glenn Zimmerman whose telephone number is (571) 272-2466. The examiner can normally be reached on M-W 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nimesh D Patel can be reached on (571) 272-2457. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
